Earning certification is a voluntary process that requires a degree from an accredited four year architecture or engineering college, an extensive review of the applicant's work experience and months of study culminated by a rigorous five hour examination. The purpose, according to the CMAA, is to set standards that identify professionals with the "formal education, field experience and demonstrated capability and understanding of the CM body of knowledge."

There are just 975 Certified Construction Managers in the world.

Sandy Loy  
state) to earn the prestigious certification of Certified Construction Manager (CCM) by the Construction Management Association of America (CMAA).

Loy earned the CCM designation after a rigorous 6-month process supervised by the CMAA's Construction
